U. S. DEPARTMENT OF AGRICULTURE
JAN 13 1910
RECEIVED

Issued October 3, 1910.
Revised December 30, 1910.

United States Department of Agriculture,

BUREAU OF CHEMISTRY.

H. W. WILEY, Chief of Bureau.

INSPECTION OF IMPORTED MEATS AND MEAT FOOD PRODUCTS UNDER THE FOOD AND DRUGS ACT OF JUNE 30, 1906.

According to instructions given in T. D. 30558, April 21, 1910, and T. D. 30716,¹ June 23, 1910, meat and meat food products imported at ports of entry where no food-inspection laboratory of the Department of Agriculture is established will be detained by the customs officials if not accompanied by a proper meat-inspection certificate. This certificate must be not only in proper form, but signed by an official inspector whose authority has been viséed before an American consul. In order that these customs officials may be informed as to the proper form of certificate and as to the names of officials qualified to sign them the following circular has been prepared, giving not only forms of certificates mentioned in T. D. 30558, but in addition those certificates which will be permitted on meat food products coming from Great Britain, and also a complete list of officials entitled to sign these certificates. This list of certified officials will be revised from time to time and sent to the officials interested.

Under Regulation 32, given below, all meats and meat food products offered for entry into the United States must be accompanied by a certificate of official inspection.

REGULATION 32.—*Imported food and drug products.*

[Section 11, article 1025, Customs Regulations, 1908.]

(a) Meat and meat food products imported into the United States shall be accompanied by a certificate of official inspection of a character to satisfy the Secretary of Agriculture that they are not dangerous to health, and each package of such articles shall bear a label which shall identify it as covered by the certificate, which certificate shall accompany or be attached to the invoice on which entry is made.

(b) The certificate shall set forth the official position of the inspector and the character of the inspection.

(c) Meat and meat food products as well as all other food and drug products of a kind forbidden entry into or forbidden to be sold, or restricted in sale in the country in which made or from which exported, will be refused admission.

(d) Meat and meat food products which have been inspected and passed through the customs may, if identity is retained, be transported in interstate commerce.

¹ See page 8.

Under this regulation it is held that importations of meat or meat food products of cattle, sheep, swine, and goats shall be subject to the same restrictions as meats of domestic origin, except as otherwise specifically provided. In this connection it is to be noted that under the terms of the meat-inspection law its provisions "requiring inspection to be made by the Secretary of Agriculture shall not apply to animals slaughtered by any farmer on the farm and sold and transported as interstate or foreign commerce, *nor to retail butchers and retail dealers in meat and meat food products, supplying their customers.*"

Regulation 32, above quoted, does not contemplate that certificates shall be required for small quantities of meat and meat food products purchased across the line and brought into the United States by the purchasers for their own consumption, nor for small shipments brought in by parcel post or otherwise for the personal use of the consignee and not for sale or distribution in any way. It is suggested that these goods be released on affidavit of consignee to the above facts.

The following definitions are adopted by the Department of Agriculture under the meat-inspection law (see Bureau of Animal Industry Order 150):

SEC. 8. MEAT FOOD PRODUCTS.—*Paragraph 1.*—A meat food product, within the meaning of the meat-inspection act and of these regulations, is considered to be any article of food intended for human use which is derived or prepared in whole or in part from any edible portion of the carcass of cattle, sheep, swine, or goats, if the said edible portion so used is a considerable and definite portion of the finished food.

Paragraph 2. MIXTURE.—A mixture of which meat is an ingredient will not be considered a meat food product unless the meat contained therein is a definite and considerable portion of the said mixture. But where such mixture is prepared in a part of an official establishment the sanitation of that part of the establishment will be supervised by the department, and the meat or meat food product will be inspected before it enters the said mixture. The mixture shall not bear the meat-inspection legend or any simulation thereof. If any reference is made to Federal inspection it shall be in the following form: "The meat contained herein has been inspected and passed at an establishment where Federal inspection is maintained." Mixtures such as mincemeat, soups, etc., which come under this description and which are not officially labeled, are allowed in interstate and foreign commerce without further inspection and without certificates, subject to the provisions and requirements of the food and drugs act of June 30, 1906, and the regulations made thereunder.

SEC. 9. MEDICAL MEAT PRODUCTS.—Products such as meat juice, meat extract, etc., which are intended only for medicinal purposes and are advertised only to the medical profession, are not considered meat food products within the meaning of this order.

Sausage casings have been held by the board to be inedible products, in conformity with the ruling of the Bureau of Animal Industry, and hence may be imported or enter interstate commerce without meat-inspection certificates.

Bureau of Animal Industry, Order 150, Regulation 23, Section 5.—The only animal casings that may be used as containers in the manufacture of sausage under these regulations are those from cattle, hogs, sheep, or goats.

Under Regulation 32 (see Food Inspection Decision 74) it is held that importations of meat and meat food products of cattle, sheep, swine, and goats shall be accompanied by certificates showing their freedom from disease. This includes oleo stearin, which will only be allowed entry under the same conditions as other meat food products. (See F. I. D. 116.) Meat food products of animals other than cattle, sheep, swine, and goats need not be accompanied by this certificate. Meat and meat food products of horses and dogs will not be allowed entry into the United States. The certificate shall be that of an official inspector of the country, district, or city in which the meat is manufactured.

Forms of certificates which are acceptable are as follows:

1. I hereby certify that the shipment of [kind of meat] consigned by ——— to ——— and designated by [distinguishing marks] is the product of [kind of animals] which by ante-mortem and post-mortem veterinary inspection were shown to be free from disease and suitable for food, and that the meat has not been treated with chemical preservatives or other foreign substance injurious to health.

2. I hereby certify that the meat-product factory of the firm of ——— is located in the meat-inspection district of the province of ———; that the animals killed in that establishment are subjected to competent official veterinary ante-mortem and post-mortem inspections; that all of the meat sold by that firm is the product of animals free from disease; and that all meat and meat food products of that firm are free from chemical preservatives or other foreign substances injurious to health.

The official inspector who signs the certificate shall have his authority viséed before the United States consul. One authorization of this kind will be sufficient for all shipments signed by the same inspector, and it will not be necessary to furnish a new authorization unless a new inspector signs the certificate. In this connection it is acceptable to the Department if the veterinarian's authority is viséed by some official whose authority shall be viséed by the American consul, as it is often impossible for the veterinarian to appear in person before the consul.

Under an agreement with Great Britain a modified form of certificate will be accepted for meat and meat food products coming from that country. This form, however, only applies to meats coming from the British Isles and not from Australia or Canada. The local government board furnishes this Department with a list of certifying officers authorized to issue these certificates, the names of which officers appear in the list of viséed veterinarians and official inspectors issued by this Bureau. Only such certificates as are signed by properly authorized inspectors should be accepted. The following

forms of certificates have been agreed upon by the local government board and the Secretary of Agriculture:

DECLARATIONS AND CERTIFICATES IN CONNECTION
WITH THE EXPORT OF MEAT FOODS TO THE UNITED
STATES OF AMERICA AND THE PHILIPPINE ISLANDS,
AS PRESCRIBED BY THE LOCAL GOVERNMENT BOARD
MEMORANDUM, 1908.

FORM A.

THE FOLLOWING DECLARATION AND CERTIFICATE ARE TO BE USED
WHERE THE MEAT FOODS ARE PREPARED, STORED, AND PACKED ON,
AND DISPATCHED FOR EXPORT FROM, *one and the same premises*:

*State the name of the sanitary district, whether borough or urban district or rural district. (1) DECLARATION by....., manufacturer of meat foods in the *.....
I (or we).....

situated in the †.....
and referred to in the foregoing declaration (2), have been and remain
under the system of sanitary supervision prescribed by the memoran-
dum of the local government board on United States and Philippine
Islands meat-food certification.

(Signed).....
Date.....

N. B.—The date in the certificate should in all cases be filled up
by the certifying officer.

SPECIAL RULE REGARDING TRANSSHIPMENT IN ENGLAND.

Occasional small consignments of meat from Australia or New Zealand are transshipped at some port in England for the United States. In order that these shipments may be allowed entry they must be accompanied when arriving in England by a proper meat-inspection certificate issued by an official veterinarian, as required by Food Inspection Decision 74, and the portion of shipment sent to the United States must be accompanied by a copy of this inspection certificate, together with a statement relative to the transshipment and the amount transshipped. These statements should come from a proper official of Great Britain, and the whole be certified before an American consul.

SPECIAL CERTIFICATES ACCEPTED FOR MEAT EXTRACTS PREPARED IN SOUTH AMERICA AND REPACKED IN BELGIUM.

Meat extracts of this kind would be allowed entry if accompanied by a copy of the original inspection certificate issued by the Government where the product was originally produced, to which is attached a further certificate issued by the Government of Belgium, signed by properly authorized officials. The following is an acceptable form of certification:

COPY OF CERTIFICATE OF COUNTRY OF ORIGIN VISÉED BY THE AMERICAN CONSUL IN BELGIUM, TO WHICH IS ATTACHED CERTIFICATE OF COUNTRY OF MANUFACTURE.

CERTIFICATE OF COUNTRY OF ORIGIN.

The head of the cattle inspection department of the ministry of agriculture of the Argentine Republic, José Leon Suarez, hereby certifies that the 600 cases per "Annette Furness" s/s,

say six hundred cases of beef extract, which are to be exported by Liebig's Extract of Meat Company (Limited), and consigned to themselves at Antwerp, Belgium, for shipment to the United States, have been inspected and contain the product of healthy cattle inspected before and after slaughter by Dr. Felice Mezzadrelli, an official inspector of the cattle inspection department of the Argentine Republic, and the meat of which was sound, healthful, wholesome, and fit for human food, and prepared under sanitary conditions. This meat food product contains no preservatives or foreign substances injurious to health and nothing has been added nor has the meat of any animal been mixed with it.

Buenos Aires, twenty April, one thousand nine hundred nine.

(Signed) JOSÉ LEON SUAREZ,
*Chief Cattle Division,
Department of Agriculture,
Argentine Government.*

(Viséed by American consul at Buenos Aires.)

I certify the foregoing to be a true and exact copy of the original document exhibited to me this tenth day of June, 1910.

(Signed) HENRY W. DIEDERICH,
Consul General, Antwerp, Belgium.

(Bearing official seal of American consulate, Antwerp, Belgium.)

CERTIFICATE OF COUNTRY OF MANUFACTURE.

The product represented by this certificate was all prepared from materials certified to the Government of Belgium by the Government of the Argentine Republic as the product of healthy cattle inspected before and after slaughter by Dr. Felice Mezzadrelli, an official inspector of the cattle inspection department of the Argentine Republic, and the meat of which was sound, healthful, wholesome, and fit for human food, and prepared under sanitary conditions. This meat food product contains no preservative or foreign substance injurious to health and nothing has been added nor has the meat of any other animal been mixed with it. The preparation at Antwerp (Belgium) was under the supervision of the health officer of the city of Antwerp, and such preparation was conducted in a sanitary place and manner.

The finished product of 14,778 lbs., packed in 264 cases, identification marks: C D Co., 3955/4218, covered by this certificate, is sound, healthful, wholesome, and fit for human food.

Dated at Antwerp, 8th June, 1910.

(Signed)

THE INSPECTOR OF HYGIENE,
DR. WEYSEN.

(Attested by burgomaster, whose authority is viséed by the American consul general, stamped with official seal of American consulate at Antwerp, Belgium.)

The certificates mentioned above will not take the place of port inspection as to the condition of the shipment on arrival, whether it is fit for human food, whether it is infested with vermin, or whether it contains any of the substances forbidden by the regulations for the enforcement of the meat-inspection law. This port inspection will be made by the inspectors of the Bureau of Chemistry, and if the meat or meat food product is found not to conform to the law, the shipment will be rejected even if the form of certificate is acceptable.

The inspection officials of the Bureau of Animal Industry stationed at New York, Philadelphia, Boston, San Francisco, Portland, Oreg., and Seattle, Wash., have been directed to cooperate with this bureau, so that imported meats and meat food products entered at these ports, although accompanied by a proper meat-inspection certificate, may actually be inspected by the experts of Bureau of Animal Industry as to whether they are of a proper kind and in proper condition.

All questionable certificates or certificates signed by a veterinarian not on the approved list, received at the branch laboratories should be forwarded to the Bureau of Chemistry for filing.

INTERSTATE SHIPMENTS OF IMPORTED MEAT FOOD PRODUCTS
WHICH ARE NOT MIXED.

Under Food Inspection Decision 73, "Imported meats and meat food products *which have not been mixed or compounded with* or added to domestic meats may be transported by any common carrier from one State or Territory, or the District of Columbia, to any other State or Territory if the packages containing them shall be marked 'Inspected under the food and drugs act, June 30, 1906,' and are so marked when received for transportation."

INTERSTATE SHIPMENTS OF IMPORTED MEAT FOOD PRODUCTS WHICH
HAVE BEEN MIXED WITH OTHER MATERIALS NOT CONTAINING ANY
DOMESTIC MEAT FOOD PRODUCTS.

Such products as, for instance, lard compound manufactured from imported oleo stearin which has been accompanied by a proper meat inspection certificate, when combined with vegetable oils can be shipped in interstate commerce if marked in such a manner as to show that it is made from imported stearin. Such products should be marked "Prepared with imported stearin" (or other meat product, as the case may be), and should not be marked in any way to indicate that they have been inspected and passed under the meat-inspection act.

IMPORTATION OF STEARIN AND OTHER MEAT PRODUCTS UNDER
FOOD AND DRUGS ACT OF JUNE 30, 1906. (T. D. 30716.)

TREASURY DEPARTMENT, *June 23, 1910.*

To officers of the customs and others concerned:

At the request of the Secretary of Agriculture, T. D. 30558 of April 21, 1910, is hereby amended so as to permit the entry at nonlaboratory ports of all stearin and other meat products which are accompanied by a meat-inspection certificate in one of the forms set forth in said decision, which must be given by an official inspector of the country, district, or city in which the meat is manufactured, whose authority shall be viséed before the United States consul. This certificate must be forwarded for inspection to the branch laboratory of the Department of Agriculture having supervision over the district in which the merchandise is entered.

Whenever shipments of such products are entered accompanied by a meat-inspection certificate which is not in accordance with the regulations, the shipment should be detained and the certificate forwarded to the proper branch laboratory of the Department of Agriculture, with the information that the shipment is detained pending decision as to the acceptance of the certificate. Ports of entry which are not included in any of the districts published in T. D. 30201 of December 17, 1909, are instructed to forward certificates to the Department of Agriculture (Bureau of Chemistry), Washington, D. C.

However, stearin purchased prior to the issuance of Food Inspection Decision 116 (Apr. 23, 1910), and invoice of same certified before July 1, 1910, may be admitted without a meat-inspection certificate if the importer shall execute and file a penal bond conditioned upon the subsequent exportation of all such stearin. The importer must also produce, upon making entry, the original contracts and such other evidence as may be required, showing that the merchandise was purchased prior to April 23, 1910. The Department of Agriculture should be informed when the lard or other compound made of the stearin is exported, and the amounts thereof.

A. PIATT ANDREW,
Assistant Secretary.

The following is a list (complete to December 15, 1910) of veterinarians and official meat inspectors viséed before United States consuls, also official inspectors authorized by the British local government board and approved by the Department of Agriculture:

LIST OF VETERINARIANS.
